Unipul®

Concentrated floor cleaner for routine and intensive cleaning of hard surfaces, removing dirt, grease and maintenance wax residues without

Technical data:

- Physical state: pink liquid.
- Specific weight (g/cm³): 1.004
- pH (20°C), undiluted product: 11
- Flash point (ASTM): > 60°C
- Flammability: non-flammable.
- Water solubility: soluble.
- Odour: characteristic.

Description:

Concentrated universal cleaner for the routine and intensive cleaning of floors and wall coverings. Effectively cleans and degreases even at low dilutions while respecting delicate materials. Also suitable for post-installation cleaning and for removing surface build-ups of dirt and maintenance wax.

Fields of application:

Suitable for routine and intensive cleaning of:

- terracotta floors and wall coverings;
- natural and reconstructed stone;
- marble and cement-based agglomerates;
- concrete;
- ceramic materials and porcelain stoneware;
- wood and parquet;
- metal;
- glass;
- laminate, PVC and synthetic surfaces.

Characteristics:

UNIPUL® is a concentrated universal cleaner for the routine and intensive cleaning of floors and wall coverings. In particular, it:

- is suitable for hard, absorbent and non-absorbent surfaces such as terracotta, clinker, stone, marble, cement-based agglomerates, ceramic materials, metal, wood, laminate, PVC and synthetic surfaces;
- is used at low concentrations for routine cleaning;
- provides effective degreasing at higher concentrations without damaging the treated materials;
- when used undiluted, removes blackened and deteriorated surface layers of maintenance wax without affecting the underlying protective treatment;
- is suitable for post-installation cleaning of delicate materials such as slate, marble and polished terrazzo;
- its low-foaming formula also makes it suitable for use with scrubber dryers;
- cleans without leaving streaks and leaves a pleasant fragrance indoors.

Instructions for use:

The application concentration depends on the material to be treated and the level of soiling.

Routine cleaning

Dilute 10–40 ml of UNIPUL® in 1 litre of water.

- Apply like a regular cleaner using a soft microfibre cloth.
- At the recommended dilution, the product is also suitable for use with scrubber dryers.

Intensive degreasing cleaning

Dilute 250 ml of UNIPUL® in 1 litre of water. Recommended for surfaces heavily soiled with mineral oils, vegetable oils, grease and for the intensive cleaning of heavily soiled wood and parquet.

- Spread the solution evenly over the surface.
- Leave it to act for a few minutes.
- Scrub with a medium-hard red pad.
- Remove residues with a microfibre cloth and rinse thoroughly with clean water.
- On treated surfaces, apply a protective anti-soiling and wear-resistant finish afterwards.

Post-installation and intensive cleaning

Use UNIPUL® undiluted or dilute it 1:1 with water. Suitable for post-installation cleaning of delicate

materials such as marble, polished terrazzo and delicate stone. It also removes blackened deposits of dirt and maintenance wax without completely removing the underlying protective treatment.

Yield:

The coverage of UNIPUL® depends on the selected dilution, the type of surface and the level of soiling. With a 1 L bottle, the approximate yield is as follows:

- Routine cleaning: one 1 L bottle prepares approximately 26 to 101 litres of cleaning solution, depending on the selected dilution (10–40 ml per litre of water).
- Intensive degreasing cleaning: one 1 L bottle prepares approximately 5 litres of cleaning solution for heavily soiled surfaces.
- Post-installation and intensive cleaning: when used undiluted or diluted 1:1 with water, one 1 L bottle provides up to 2 litres of cleaning solution.

The actual area that can be treated depends on the surface, the level of soiling and the application method.

Precautions:

- None.

Warnings:

WARNINGS: ATTENTION

Hazard statements: Causes serious eye irritation. - Causes skin irritation.

Precautionary statements: Wear protective gloves and protect eyes / face. - If eye irritation persists, consult a doctor. - IF IN EYES: rinse thoroughly for several minutes. Remove any contact lenses if easy to do. Continue rinsing. - IF ON SKIN: wash with plenty of water / . . . - In case of skin irritation: consult a doctor.

Ingredients compliant with Regulation (EC) No. 648/2004:

Non-ionic surfactants < 5 %, perfume (D-Limonene, Linalool, Hexil cinnamal).

Notes:

Our recommendations are based on current research knowledge and are intended to give the best information to the buyer-user. However, these indications require preliminary examinations and tests to the fields of use, to the types of materials present and to the various conditions of application. The user decides independently on suitability and on the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products. Rev9-Ver08062023

Storage:

Keep the product tightly closed at temperatures between 0°C and + 30°C and not exposed to sunlight for a long time. The stored product has a useful life of 2 years.

Packaging:

- 1 L PE bottle – box of 6 bottles
- 1 L PE bottle + RED BUFFER PAD
- 5 L PE jerrycan – box of 4 jerrycans
- 10 L PE jerrycan
