SEIGENICO

Chlorine-free sodium percarbonate powder for whitening laundry, removing stains and boosting cleaning with active oxygen from low

Technical data:

- Physical state: white granular powder
- Bulk density (g/cm³) at 20°C: 2.01–2.16
- pH (20°C) (10 g/L solution): 10.4
- Flash point (ASTM): non-flammable solid
- Water solubility: soluble (max 140 g/L)
- Odor: odorless

Description:

Granular sodium percarbonate powder for everyday laundry and household cleaning. It removes stains and whitens at low temperatures with active oxygen, supporting sanitizing above 50°C. Suitable for hand and machine washing, hard surfaces and soaking. Chlorine-free and free from fragrances, preservatives and surfactants.

Fields of application:

Indicated for:

- hand washing fabrics
- machine washing laundry
- pre-treating stains on fabrics
- soaking dishes and various household items
- deep cleaning hard surfaces
- floors and wall coverings
- countertops and worktops
- sinks and sanitary fixtures

Characteristics:

SEIGENICO is a water-soluble granular powder based on sodium percarbonate, designed for everyday household cleaning as a stain remover, whitener and sanitizing booster (above 50°C). In particular:

- it dissolves easily in water, is simple to use and offers long shelf life;
- it removes stains, whitens fabrics and supports sanitizing thanks to active oxygen released starting at 30–40°C;
- it is suitable for hand washing and machine washing, including as a pre-treatment for stubborn stains;
- it can be used for deep cleaning hard surfaces and for soaking dishes and various household items;
- it does not contain chlorine, allergenic substances, fragrances, preservatives, optical brighteners, bleaching agents or surfactants.

Instructions for use:

Powder product to be diluted in water according to the intended use.

During handling, it is recommended to wear protective gloves and avoid contact with eyes and skin.

- In the washing machine as a whitener
Add 1 tablespoon of product directly into the drum or detergent drawer together with your regular detergent. Dosage refers to a 4–5 kg laundry load.
- In the washing machine for stubborn stains
Add 2 tablespoons of product into the drum or detergent drawer together with the detergent.
- Pre-treatment on localized stains
Sprinkle a small amount of product directly onto the stain, moisten with lukewarm water and leave to act for 15–30 minutes. Then proceed with normal washing.
- Deep cleaning of dishes and household items
Dilute 4 tablespoons in 1 liter of lukewarm water and leave to soak for 30–60 minutes. Dry or rinse thoroughly afterward.
- Cleaning hard surfaces
Dilute 2 tablespoons in 1 liter of lukewarm water and apply the solution to the surface to be treated.

Yield:

Product coverage depends on the level of dirt, the amount of solution prepared and the application method.

With a 1 kg pack, the indicative yield is as follows:

- Ordinary laundry washing

For regularly maintained laundry (1 tablespoon per 4–5 kg load), one pack provides up to approximately 50 washes, adding the product to the drum or detergent drawer together with the detergent.

- Laundry with medium soiling
In the presence of more visible stains or widespread dirt (alternating between 1 and 2 tablespoons per wash), 1 kg provides approximately 33–40 washes.
- Stubborn stains
Using 2 tablespoons per cycle for persistent stains, coverage is reduced to around 25 washes.
- Soaking dishes and household items
Diluting 4 tablespoons per liter of lukewarm water, one pack provides approximately 12–25 soaking cycles, depending on concentration and contact time.
- Cleaning hard surfaces
With a dilution of 2 tablespoons per liter, 1 kg allows approximately 25–50 solution preparations, depending on the size of the treated surfaces.

When dealing with particularly heavy dirt, it may be necessary to increase the dosage or extend the contact time, which will reduce the total number of treatments available.

Regular and preventive use helps maintain a high level of cleanliness over time and optimizes the overall product performance.

Precautions:

Do not use on:

- wool garments
- linen garments
- silk garments
- natural leather

Use is not recommended for treating blood stains, as oxidation may create residues that are more difficult to remove than the original stain. During handling, protect eyes and hands by wearing suitable protective gloves.

Warnings:

WARNINGS: DANGER

Hazard statement: May intensify fire; oxidiser. – Harmful if swallowed. – Causes serious eye damage.

Precautionary statements: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. – Keep away from clothing and other combustible materials. – IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. – Wear protective gloves/protective clothing/eye protection/face protection/hearing protection/... – Immediately call a POISON CENTER/doctor/ ... – In case of fire: Use... to extinguish. – Wash ... thoroughly after handling.

Contains: Sodium Percarbonate EC No. 239-707-6.

Rev1-Ver27012026

Notes:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

Storage:

Store in a well-ventilated, dry area and keep the product in tightly closed containers. Always avoid temperatures above 40°C and prolonged direct exposure to sunlight. When stored correctly, the product has a shelf life of 5 years. The powder may harden over time without affecting its effectiveness.

Packaging:

- 1 kg plastic jar – boxes of 6 units
- 5 kg plastic bucket – boxes of 4 units
